## *Fire Fighting* Pumps

POWERED by  
**HONDA**

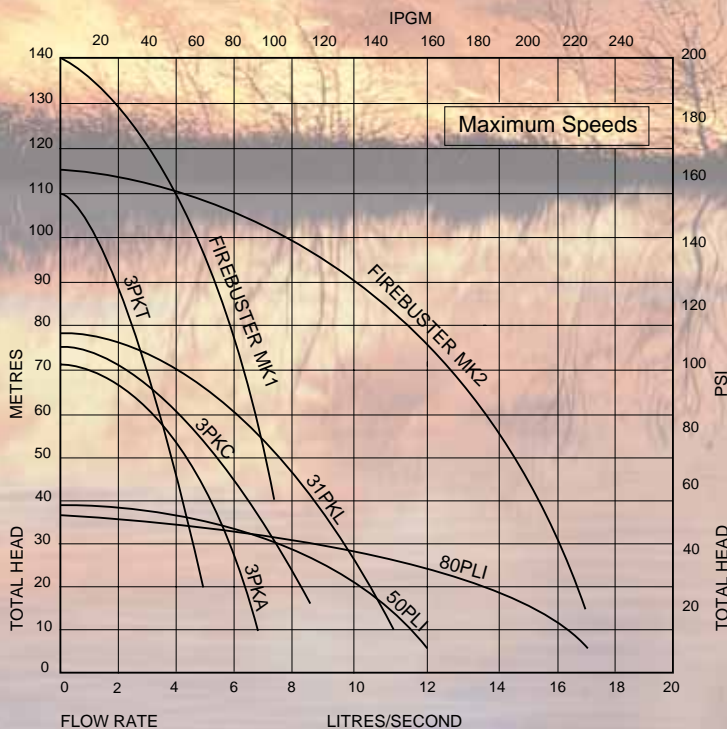

# Regent *fire* Fighting

Our fire pumps are lightweight, portable pumps designed to deliver high performance in a variety of applications.

## Construction:

- \* Alloy body and backplate
- \* Machined and balanced impeller
- \* Replaceable carbon ceramic seals
- \* Stainless steel shaft sleeve
- \* All self priming fire pumps feature replaceable cast iron suction and discharge ports.

## Performance

## Design Features:

### Reliable 4 Stroke Engine

These pumps feature a powerful 4 stroke 3HP-13HP transistorised ignition petrol engine or diesel engine with automatic decompression for easy starting. An optional electric start can be fitted if required.

### Lightweight Construction

For maximum efficiency and durability each model combines an aluminium body, tough cast iron diffuser and your choice of aluminium or cast iron impeller.

### Wide Range Of Models

There is a broad range of models available including 1.5", 2" or 3" pumps that provide heads up to 140m (200psi) with maximum flow rates up to 17 l/s (13000gph).

### Easy Maintenance

Removable suction and discharge ports allow for easy replacement of the ports if the threads become damaged as well as the easy replacement of the suction flap valve if and when needed.

## Applications:

- \* Firefighting / Burn Off
- \* Agricultural Irrigation
- \* Dewatering
- \* General Water Applications
